Results-driven Software Developer with 2 years of experience in developing and optimizing applications. Skilled in communication, creativity, and technical problem-solving, with a proven track record of delivering efficient solutions. I am a self-motivated and optimistic professional, focused on continuous learning, growth, and strengthening leadership and teamwork abilities.

PROFESSIONAL EXPERIENCE

ProcessDrive India Pvt. Ltd.

Hosur, India

Software Developer

SEP 2024 - PRESENT

- Key developer in the RentAsst project
- Redesigned the complete application UI, vastly improving the user experience and driving a 30% increase in overall sales.
- Developed a comprehensive inventory and rental management system, including an end-to-end Expense module for streamlined financial tracking.
- Engineered a seamless Google OAuth login flow and integrated multi-language support across the platform.
- Executed robust automated testing for the mobile application using the Patrol framework to ensure cross-device stability.

PROJECTS

RentAsst

An inventory and rental management system for rental business owners, featuring invoicing, rental tracking, and order management from one dashboard.

Tech stack – Flutter/Dart, PHP/Laravel, MySQL, Patrol, Play Store / AppStore Deployment

IoT Enabled EMG Signal Management for Patient Alerts

A sensor-driven monitoring system that reads EMG (muscle signal) data from a wearable sensor and instantly alerts a patient's guardian if it detects abnormal readings.

Tech stack – IoT, Embedded Systems, Sensors, Mobile Alerts

Drowsiness Detection System

Developed a system for road safety by detecting driver drowsiness and sending the alerts signal to the concern company.

Tech stack – Python, OpenCV, Computer Vision

TECHNICAL SKILLS

Languages: Dart, PHP, Go Lang

Frameworks: Flutter, Laravel, Fiber, Patrol

Database: MySQL, PostgreSQL

Deployments: Play Store / App Store deployment, Frontend / Backend Server Deployment

EDUCATION

Bachelor of Engineering – CSE, Paavai College of Engineering, 2024

CERTIFICATIONS

Anthropic – Building with the Claude API, 2026

Anthropic – AI Fluency Framework & Foundations, 2026

Anthropic – Introduction to Model Context Protocol, 2026

Udemy – UI/UX Design with Figma, 2025

SIMATS ENGINEERING – International Conference on Recent Trends in Computing and Communication Engineering

Google Developers Student Club – Maximum students doing Python in the Google Collab, 2023

AWARDS

Best Commitment Award – ProcessDrive – Jul, 2026

Best Student Award – Naan Mudhalvan – 2024
